

ELECTRIC <--> MOMENTUM

**Electric momentum - Nomadic the temple
The battles are endless between the idea and the brightness
The weather is changing - Therefore the law needs to change too
Changes of mother nature... Affect human nature!
The sun getting closer - Stronger Vibrations
If they don't change the taxation - She is gonna send the Tsunami
If we don't treat her with kindness - She is gonna cry on an earthquake**

once again,

*Betrayed by the unbearable impermanence of the mind
while yearning for the fix of killing a weaker species.
Aim to revive the flourishing scattered esteem
seeds of the undefeated mind's playfulness.
Couldn't wait anymore for the deep ocean fish,
convinced by the victorious history of their depraved actions
leads feeding throughout their bloody trail.
while on the other side...
The blushing abundance learned fishing while feeding the fish
along with the melodic chants of the sunset waves
between the bottom of the belly of the bay and the screeching of the hawk
in synchronicity with the eternal deepening reflection of the ocean within.*

**The plate of acceptance
is full when is empty
There is no substitute
but to express gratitude
Just wait for the message
the gift of the lesson
One step to enlightenment
through acceptance alignment
seduce by forgiveness
Dissolve the resentments
Embracing with greatness
Seduce the present with thyself claim-less
And then... tomorrow feels greater!
Eliminate metallization
Emptiness is illumination
Communicate through vibrations...
*Love - not need - not language***
